IBRAHIM ABDULLAH AZZAM

Banyuwangi, Indonesia 64645 | +6281249946129 | ibrahimabdlh23@gmail.com | LinkedIn | Github

Telecommunication Engineering student at Institut Teknologi Bandung (ITB) with a strong willingness to learn and grow, actively enhancing expertise through certifications in Cloud Computing, Cybersecurity, Networking, Software Development, and Linux System Administration. Demonstrated leadership as former Division Head in the Student Association Senate and as an active member of multiple student organizations, driving initiatives that bridge technical innovation with organizational goals. Passionate about leveraging multidisciplinary knowledge to solve complex challenges and deliver impactful results in the technology consulting arena.

EDUCATION

BANDUNG INSTITUTE OF TECHNOLOGY

Telecommunication Engineering *2021-2025*

- Current GPA: 3.34/4.00 (until 7th semester)
- Relevant Coursework: Cyber Security, Networking, Cloud Computing, IT Infrastructure, Website Development, Embedded System, Database Management and Modelling, Project Management

PROFESSIONAL EXPERIENCE

UNIVERSITAS MUHAMMADIYAH BANDUNG *Hybrid*

PT SMB develops high-quality websites and digital systems for businesses. We combine solution and technology to help organizations optimize their online performance and workflow efficiency

Full Stack Engineer *Jun 2024 - present*

- Created 3+ websites and mobile apps for preventive maintenance, enhancing efficiency and engagement
- Developed solutions that increased student payments from 2 billion to 12 billion IDR
- Defining and discussing Business Processes by identifying and mapping processes in line with company goals

PT REASURANSI INDONESIA UTAMA (Persero) *On-Site*

PT Reasuransi Indonesia Utama (Persero), known as Indonesia Re, is a state-owned national reinsurer with over Rp 6 trillion in assets and a 30% market share of Indonesia's reinsurance sector, operating since 1985

IT Infrastructure Assistant *Jun 2024 - Aug 2024*

- Secured and managed the corporate network for 250+ users by configuring and hardening firewalls, establishing VPN connections, and enforcing comprehensive security policies and access controls
- Monitored and responded to daily cyber-attack alerts using IBM QRadar, performing in-depth threat detection, analysis, and incident response to maintain robust system security

ORGANIZATIONAL EXPERIENCE

KESENATORAN IMT "Signum" ITB *On-Site*

IMT "SIGNUM" ITB is the official student representative body of ITB's Telecommunication Engineering students, responsible for conveying student aspirations to relevant stakeholders

Head of Research and Student Division *Feb 2024 - Des 2024*

- Ensure that every policy proposed or implemented by the ITB Student Executive Board receives comprehensive and critical review from the student perspective
- Build collaborative networks with other student associations and related organizations to strengthen the senate's position and influence in campus policies

BENGKEL RADIO IMT "Signum" ITB *On-Site*

Radio Workshop is a semi-autonomous body under IMT 'Signum' ITB. In the Radio Workshop, staff members will study fields related to telecommunications such as Cybersecurity, IoT, Networks, Web, Cloud, and Radio Frequency

Staff of Network and Security Division *Feb 2024 – Des 2024*

- Understand basic and advanced concepts of cloud infrastructure, computer networks, including configuration, management, and network security
- Responsible for handling project related to Cybersecurity, Networking, Web, Cloud, IoT, and Radio Frequency
- Successfully completed projects related to Network, Web, and Cloud assigned by lectures

SELECTED PROJECT EXPERIENCE

Growvanta: Smart IoT-Enabled Sustainable Farming Solution *2025*

- The project is an innovative IoT-based platform designed to optimize agricultural productivity through real-time monitoring and data-driven management. It enables sustainable farming by integrating sensor data, AI analytics, and automation to improve crop health, resource efficiency, and yield quality

Web3 Document Authenticity Checker *2024*

- This project aims to develop a decentralized web3 application that leverages blockchain technology to verify the authenticity of documents securely and transparently. By storing document hashes on a blockchain, users can easily

check if a document is original or has been tampered with, ensuring trust and integrity without relying on centralized authorities

SIEM Implementation Using Wazuh and pfSense for Enhanced Network Security *2024*

- This project focuses on deploying a Security Information and Event Management (SIEM) system by integrating Wazuh with pfSense firewall to monitor, detect, and respond to network threats in real-time. It enhances cybersecurity posture by collecting and analyzing logs, enabling proactive threat management and incident response

Mathematical Modeling Group Maneuvering Simulation *2023*

- Project that focuses on building mathematical models and simulations to represent ship movements in various scenarios

IoT Environmental Monitoring Dashboard *2023*

- Designing a system capable of displaying real-time data such as temperature, humidity, alcohol level, motion detection, and geolocation information for a product on an IoT dashboard

COURSES AND CERTIFICATION

- Certificate Courses: AWS Academy Cloud Foundations *2024*
- Certificate Courses: Red Hat System Administration I and II *2024*
- Certificate Courses: CCNAv7(Enterprise Networking, Security, Automation, Switching, Routing, and Wireless Essentials) *2024*
- Certificate Courses: Red Hat OpenShift Administration I - Managing Containers and Kubernetes 4.12 *2024*
- Certificate Courses: Cisco - CyberOps *2024*
- Certificate Courses: Kaggle - Data Analyst *2024*
- Certificate Courses Architecting on AWS *2023*

ACHIEVEMENTS AND SKILLS

- Achievement: 3rd Place Asia-Pacific Level AI & IoT Competition 2025, Huawei (Malaysia)
- Achievement: 1st Place Nasional Level AI & IoT Competition 2024, Huawei (Indonesia)
- Hard Skills: Cyber Security, Cloud Computing, Networking, System Administration, Programming, Machine Learning, Data Analyst
- Programming Language: Python, Matlab, Haskell, Javascript, PHP, Go, Typescript
- Tools: AWS, Linux, IBM QRadar, Wazuh, pfSense, Cisco Packet Tracer, Burp Suite, Git, Postman
- Soft Skills: Public Speaking, Communication, Collaborative, Problem Solving, Hard Working, Growth mindset
- Language: Indonesia, English
